BSc DIGITAL AND TECHNOLOGY SOLUTIONS

Degree Apprenticeship

DIGITAL AND TECHNOLOGY SOLUTIONS
PROFESSIONAL (INTEGRATED DEGREE)
Degree Apprenticeship Standard: ST0119

Equip your workforce with the expertise to develop innovative digital solutions.

The BSc Digital and Technology Solutions Professional Degree Apprenticeship provides online learning and on-the-job experience to transform learners into highly skilled tech professionals. The Degree Apprenticeship is available in four specialisms: Network Engineer, Software Engineer, IT Consultant and Data Analyst.

This programme develops core technical skills, knowledge and behaviours for the development of innovative digital solutions. This includes areas such as IT Project Management, Data Modelling and Database Design, Software Engineering, Cloud Solutions and Architectures, and Developing Technology Strategy. Further specialist modules and professional practice offer an opportunity to develop technical areas of relevance to the learners' roles.

Flexible professional practice modules allow employers or learners to choose specific areas of development depending on their organisation and job role.

Unrivalled learner support system with:

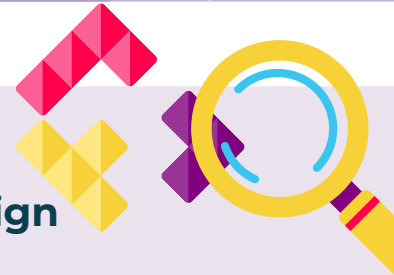

- Dedicated digital learning consultants
- Intuitive learning portal
- Live tutor interaction
- Prompt chat support
- Reliable contact services

Access to Cloud Academy

10,000 hours of training, cutting-edge labs and sandboxed environments, to build confidence and competencies, risk-free.

Digital by Design

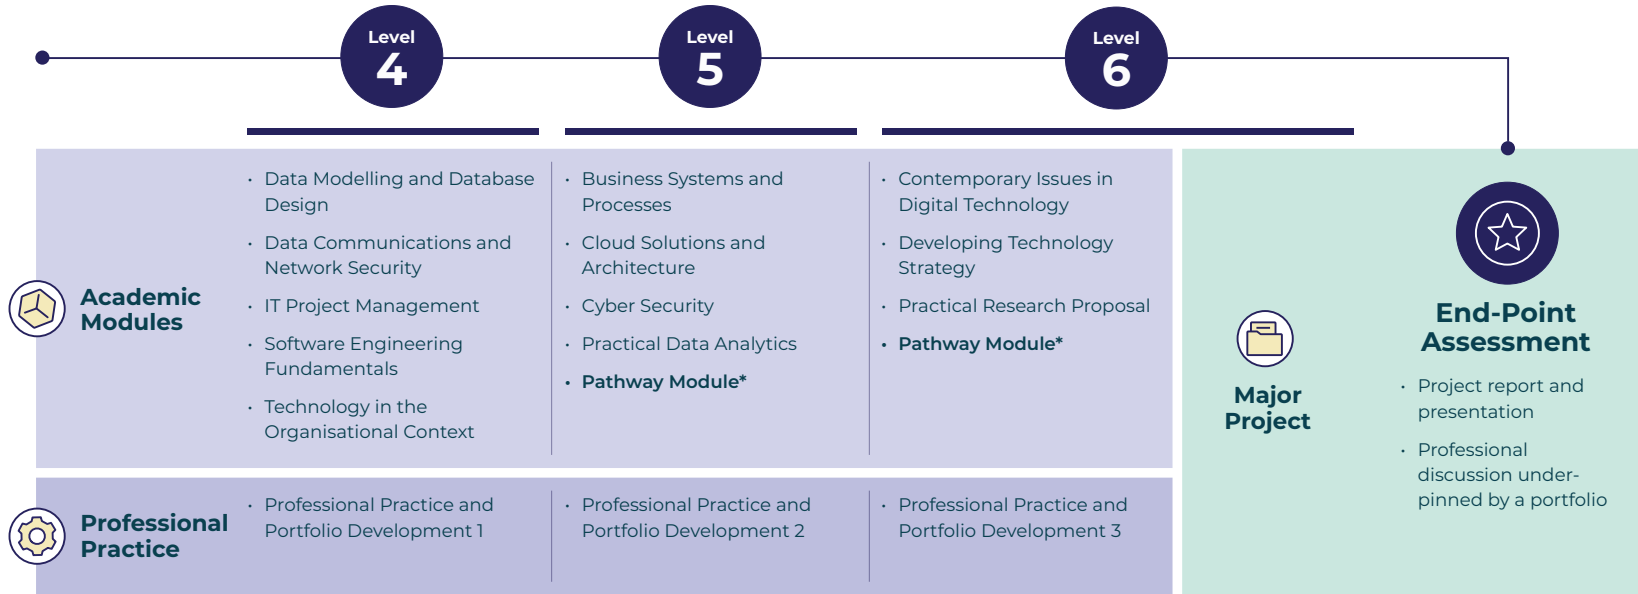

Our unique approach to learning design blends cutting-edge tech, engaging content and dedicated learner support.

We are bringing training up to date for the digital age, helping learners deliver meaningful impact to your business, faster.

This translates into greater career success, and a futureproof organisation.
